

Unitech Earth Pit

Cat No.
PIT03

High Impact Easy to use

The easy locking lid (rated to 5000kg) with security key offers a high level of protection for critical grounding terminations.

The UV Stabilized Polypropylene material offers protection against sunlight degradation, and is non-brittle to prevent cold weather damage.

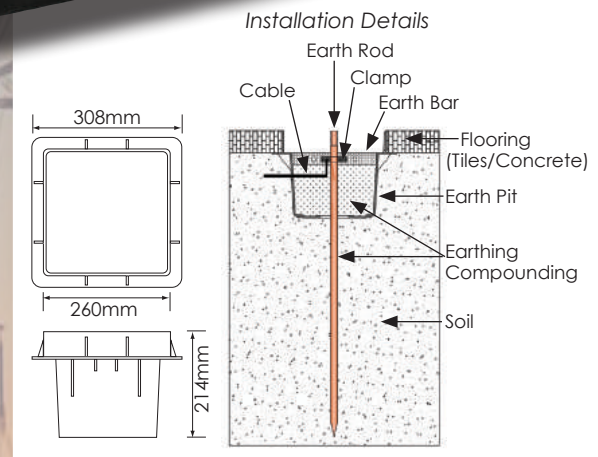

The large working aperture allows easy access for ground termination maintenance. The lightweight design also allows for easy handling, storage and transportation.

Ideal for paving and hot tar applications. Suitable for pipe in pipe and earth rod.
